

# What Others Have Said

## Praise for John Dunn's School Presentations

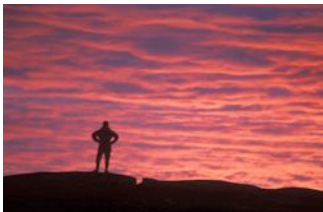

"It was a privilege to be a part of the audience for your presentation. The theatre was filled with over 200 middle years students whose attention never wavered. I appreciated the sincerity and warmth that encompassed your presentation, your special manner made it all seem possible to my students." **Janice Walker-Szaroz, Ecole River Heights School, Saskatoon**

"It is an act of faith inviting anyone to give a talk to 15 year olds at a school, let alone someone from across the world. As one boy summed it up afterwards: "We have got to get this bloke back again, that was terrific". Well done and thank you." . . . **John Norris, Senior Master, Christ Church Grammar School, Perth, Australia**

"His presentations are a special experience for students as he brings to his listeners an exciting sense of the adventure inherent in his travels. Our staff are pleased to recommend this presentation as a most worthwhile educational and life experience." . . . **Fern Langemann, Formerly Assistant Principal, Marion Carson Elementary School, Calgary**

"Your lecture was brilliant! Everyone who was there has been enthusing about it. The photography, and its presentation were stunning, and your talk was fluent and easy and pitched at the right level. Please do come again when you make your next tour over here." . . . **Charles Mitchell-Innes, Milton Abbey School, England**

"Thank you very much for your brilliant slide presentation and inspiring lecture. What was particularly impressive was the manner in which you were able to deftly weave in various life themes which have an application not only to young people and also to those responsible for them." . . . **Norman Drummond, formerly Headmaster, Loretto School, Scotland**

"Your presentation on the Baffin Traverse was without a doubt among the most informative, motivating and educational that we have ever had at our school." . . . **David Walsh, Lakefield College School, Ontario**
